Shear servicing and reconditioning program

The *Embrey* Attachments reconditioning program can provide new life for your tired attachment. Complete reconditioning or major component repair with factory trained expertise, experience and commitment to quality. Specialising in *LaBounty* shear rebuilding and servicing but we can also service any make of shear.

Shear Blade kits

Every *Embrey* and *LaBounty* shear blade is engineered to precise specifications. *Embrey* and *LaBounty* cutting blades are exclusively designed for optimal use of edges resulting in the greatest possible blade efficiency and lowest possible cost per cut. Complete Blade Kits are offered at discounted prices compared to buying individual parts. Please contact us to order your supply of spare parts for any *Embrey* or *LaBounty* model, new or old.

Hydraulic Rotation Kits

Internal accumulator Hydraulic Rotation Kits provide rotation when a spare hydraulic supply circuit is not available. The kit is built into the head of the attachment itself.

Replaceable teeth system

Replaceable teeth are standard equipment on most *Embrey* Concrete pulverisers. These exclusive pin on teeth allow end users to change-out teeth quickly and reduce the need for build-up and hardfacing.

Spare parts

Embrey Attachments PL carries a large range of spare parts for shears and other attachments. We can also manufacture any spare parts that are not in stock and also for other brand attachments as well.
