

HYDRAULIC ROTATING GRAPPLES

AUSTRALIAN DESIGNED & MANUFACTURED HYDRAULIC ROTATING
WASTE & VEGETATION GRAPPLE ENGINEERED TO WORLD CLASS
STANDARDS

The **Embrey Vegetation Grapple** is expertly designed for the green waste industry, making it an invaluable tool for loading grinders and handling green waste of all sizes. Engineered for efficiency, it allows for seamless management of diverse materials, from small debris to large branches. Equipped with 360-degree continuous rotation, twin synchronized moving jaws, and a broad body, the grapple ensures a secure, stable grip, even on uneven or bulky loads. This combination of features makes it highly effective for maximizing productivity and minimizing handling time in green waste processing.
