

## HYDRAULIC ROTATING WASTE GRAPPLE

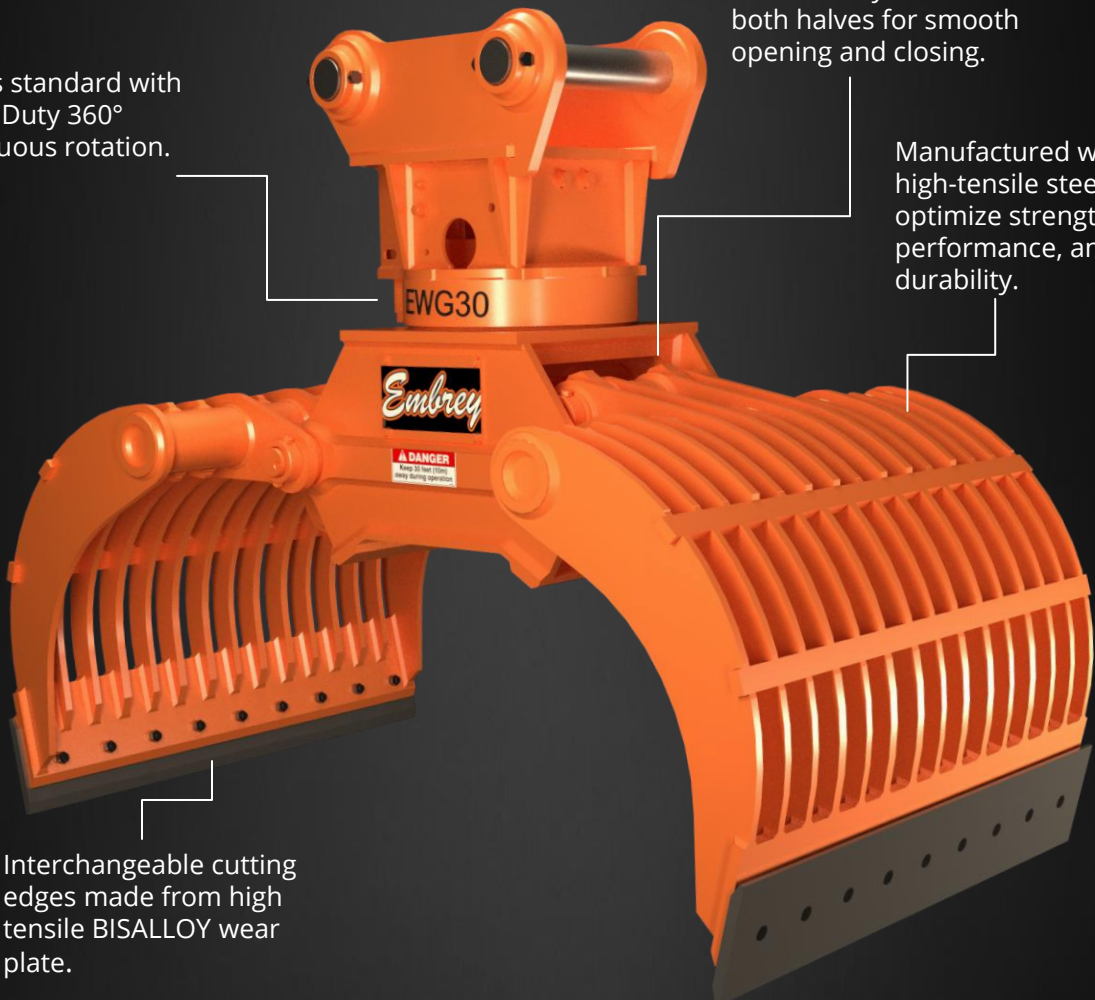

AUSTRALIAN DESIGNED & MANUFACTURED HYDRAULIC ROTATING WASTE GRAPPLE ENGINEERED TO WORLD CLASS STANDARDS

Comes standard with Heavy Duty 360° continuous rotation.

Link arms synchronize both halves for smooth opening and closing.

Manufactured with high-tensile steel to optimize strength, performance, and durability.

Interchangeable cutting edges made from high tensile BISALLOY wear plate.

The **Embrey Attachments EWG Waste and Demolition Grapple** is an exceptionally reliable and versatile tool, designed to excel in demanding environments. Built with durable BISALLOY cutting edges, it efficiently manages a wide range of tasks, including picking, demolishing, sorting, loading, and recycling various materials. The grapple's 360-degree continuous rotation capability provides seamless maneuverability, allowing operators to easily pick up and precisely sort objects and materials from any angle. Engineered for strength and longevity, the EWG Grapple ensures dependable performance across diverse applications, making it an essential attachment for waste management, demolition, and recycling tasks.
